Course aim:

To equip paediatricians involved in child protection cases with the skills to gather evidence as part of clinical practice and effectively present this within multi-agency collaborations, professional witness reports and court testimony.

Learning outcomes:

By the end of this course you will be able to:

- Deal with common child protection concerns that arise in your clinical practice
- Present the medical perspective of a child protection assessment within multi-agency meetings
- Appear as a professional witness (having written a report to the court's required specifications) with the skills and confidence required to provide the best possible outcomes for the child
