1530 - 1550  COFFEE AND POSTER VIEWING

SESSION 3  THE CHARLES MCNEIL LECTURE AND PRESENTATION OF PRIZES

CHAIRPERSON  Dr Mairi Stark, Consultant Paediatrician

1550 - 1630  The Charles McNeil Lecture
“Early Years – the closest thing to magic without actually being magic”
Mr John Carnochan OBE QPM hon. LLD FFPH, Expert in violence prevention and Senior Fellow of Worldwide Alternatives to Violence (WAVE Trust)

Synopsis and aims of presentation:

Violence infects the wellbeing and health of communities throughout the World, the daily stress and fear experienced by individuals and families inhibits lives and aspirations, it makes people ill.
The lack or disruption of safe, stable and nurturing relationships in early childhood can have severe and long lasting effects. Preventing violence through the development of safe, stable and nurturing relationships between children and their caregivers must become a key component of all national strategies.
There is an increasing awareness that sustainable reductions in violence will only be achieved through positive and effective collaborative effort. However the strategies, systems and structures that exist today can only manage the wicked problems we face. New thinking is required if we are to make these wicked problems better and as part of that new thinking we must acknowledge the value of our human attributes, they are at least as important as our professional skills. Success is never achieved solely as a result of strategy or process but rather the quality and effectiveness of our relationships with colleagues, partners and patients. Relationships are at the heart of everything we do.

Aims of the presentation:

To:
- Identify the connections between violence and health inequalities
- Highlight the challenges as well as the potential of effective collaboration
- Highlight the importance of primary prevention
- Highlight the importance of personal leadership.

1630 - 1640  Presentation of prizes for best research, case and poster presentations.
Dr Ishaq Abu-Arafeh, President Scottish Paediatric Society

1640  Closing remarks
Dr Mairi Stark, Consultant Paediatrician
