 %

What proportion of the time in the past week has enough COVID-19 testing been available for paediatric staff in your organisation?

 %

Activity

In the **7 days up to 08:00 on Tue 07 Jul 2020** has there been a change in any of the following areas of activity due to COVID-19? This is compared to "normal" levels of activity, i.e. the same week in previous years.

Hospital inpatients

Increase Decrease No Change

Urgent care/Emergency Department

Increase Decrease No Change

Planned admissions (e.g. investigations)

Increase Decrease No Change

Outpatients

Increase Decrease No Change

Routine statutory work (e.g. SEND, LAC, safeguarding peer review)

Increase Decrease No Change

Sudden Unexpected Death in Childhood/Infancy

Increase Decrease No Change

Other (please specify)

Has your service seen a change in the number of Non-Accidental Injury referrals since before the pandemic?

Increase Decrease No Change

How many children have "presented late" to the Emergency Department at risk of harm related to...

Delay in acute new conditions (e.g. sepsis, surgical abdomen, head injury)?

Exacerbation of long term conditions (e.g. asthma, epilepsy, diabetes)?

Please add any further comments here

Innovations and concerns

Now that services are starting to return to normal, are you aware of any areas that are struggling to restore (such as Rapid Access Clinics, immunisation, child protection medicals), and if so, what are the reasons?

Do you have any concerns about your service, such as impact on patient safety, that you would like to share confidentially with us?
