CHILD DEVELOPMENT ASSESSMENT MATERIALS CHECK LIST

These are the Development Kit items that would normally be available to a candidate when they entered the Development station in a face-to-face exam. Candidates sitting the exam remotely will be expected to talk the examiner through the developmental exam they would perform if they were with the child in a face-to-face setting. Candidates will be expected to make appropriate use of/reference to any of these items they feel are necessary. Please also see the photograph of these items on the Covid Adapted Clinical Exam Hub webpage.
