

Sample

Please note **you will only need to complete this questionnaire once**; following weekly data submissions will only consist of ten questions.

Please answer all these questions with reference to the **7 day period ending at 08:00 on Thu 10 Jun 2021**.

Staffing and capacity

Please answer the following questions as compared to "normal" levels of staffing and capacity, i.e. the same week in previous years.

What proportion of paediatric **inpatient capacity** is lost to adult services?

 %

What proportion of paediatric **outpatient capacity (e.g. clinics)** is lost to adult services?

 %

Do you currently have any paediatric **physical outpatient space** lost to adult services?

Yes No

What proportion of paediatric medical staff are **not available to do any paediatric work** due to redeployment, illness, shielding, etc.

 %

What proportion of paediatric medical staff are **not available to do face-to-face work**, but are working in other ways (e.g. shielding but working from home)?

 %

What proportion of **tier 1 acute paediatric medical staff** have been moved to **adult services**?

 %

What proportion of **tier 2 acute paediatric medical staff** have been moved to **adult services**?

 %

What proportion of **tier 3 acute paediatric medical staff** have been moved to **adult services**?

 %

What proportion of **community trainees** have been redeployed to **another area of paediatrics**?

 %

What proportion of **community career grade staff** have been redeployed to **another area of paediatrics**?

 %

What proportion of other paediatric **subspecialty career grade staff** have been redeployed to **another area of paediatrics**?

 %

How many **paediatric out of programme (OOP) academic trainees** have returned to the clinical service to support the pandemic response?

Staff workload and wellbeing

Are there currently any paediatric medical staff **absent due to stress**?

Yes No

Are you worried that it is likely that a **consultant will be absent due to stress over the next 3 months**?

Yes No

What proportion of paediatric medical staff have had a **risk assessment for COVID-19**?

% 

What proportion of paediatric medical staff are **over 60 or from a BAME background**? (This group do not count as "clinically vulnerable", but are at higher risk from COVID-19.)

% 

What proportion of paediatric medical staff are classed as **clinically vulnerable** due to personal risk factors for COVID-19? (This includes those who are pregnant, over 70, have an underlying health condition, or are on immunosuppressants. See a [full list here.](#))

% 

What proportion of paediatric medical staff are classed as **clinically extremely vulnerable** due to personal risk factors for COVID-19? (This includes more serious health conditions. See a [full list here.](#))

% 

How regularly are all paediatric medical staff being **tested for COVID-19** at the moment (symptomatic or not)?

Twice a week Once a week Less frequently Only receiving tests if symptomatic
 No access to tests even if symptomatic

What proportion of the time in the past week have you had enough **Personal Protective Equipment** (that safely fulfils the [UK government guidance](#)) for paediatric medical staff in your organisation?

% 

Have **SAS doctors been stepping down** to cover the junior doctor rota in paediatrics in the past week?

Yes No Not applicable

Have **consultants been stepping down** to cover the junior doctor rota in paediatrics in the past week?

Yes No Not applicable

Activity and patients

Do you have any concerns about **virtual consultations** in your service? (Please select all that apply)

Not seeing the patient (only their parent/carer)

Yes No

Risk of missing safeguarding issues

Yes No

Risk of missing other health issues

Yes No

Problems with patient accessing technology (including lack of access to internet, proper equipment, or poor connection)

Yes No

Lack of ability to ensure patient confidentiality (e.g. because other family members are present)

Yes No

Communication issues (e.g. due to language barrier)

Yes No

Other, please specify

What proportion of **inpatient beds** are currently occupied by a child or young person **admitted primarily for their mental health need**?

 % 

Does your service have an **effective joint pathway with CAMHS** to manage young people with mental health needs?

Yes No

Are children currently being seen in the **Emergency Department (ED)**?

Yes, seen in the ED as usual No, going straight to inpatients Not applicable Other, please specify below

Other arrangements for children currently attending the Emergency Department:

Have children and young people been explicitly mentioned in your organisation's winter plan?

Yes No

Has **transfer** of care of young people with **significant medical complexity** to **adult services** been **paused due to COVID-19**?

Yes No
