

BRITISH PAEDIATRIC SURVEILLANCE UNIT

Reporting Instructions & Case Definitions – JULY 2023

When reporting a case **PLEASE** keep details of patients for reference.

IMPORTANT NOTICE

Please inform the office of retirements or circumstances that will affect your ability to return the orange card. Complete the report card by ticking "nothing to report" or indicating the number of cases of the listed conditions seen in the month specified.

1. Progressive intellectual & neurological deterioration (Excluding Republic of Ireland)

Case Definition: Any child under 16 years of age at onset of symptoms who fulfils **ALL** of the following three criteria:

- Progressive deterioration for more than three months with
- Loss of already attained intellectual/developmental abilities and
- Development of abnormal neurological signs.

Excluding: Static intellectual loss e.g. after encephalitis, head injury or near drowning.

Including: Children who meet the case definition even if specific neurological diagnoses have been made.

- Metabolic disorders leading to neurological deterioration.
- Seizure disorders if associated with **progressive** deterioration.
- Children that have been diagnosed as having neurodegenerative conditions but not yet developed symptoms

Reporting restricted to: Cases seen in the last month but including those whose conditions began earlier (i.e. including 'old cases' of children in follow-up if seen in that month).

Reporting Instructions: Please report any child seen in the last month who meets the case definition, including those who have already been given a specific diagnosis.

2. Acute Hepatitis 22

Case definition: Any case where the clinician has made a clinical diagnosis of acute hepatitis with the following:

1. discrete onset of symptoms suggestive of hepatitis (e.g. fever, jaundice, abdominal pain, fatigue, loss of appetite, rash, itch, joint or muscle ache, dark urine, pale coloured stools, nausea or vomiting);
AND
2. elevated serum alanine aminotransferase (ALT) levels (>500IU/L)
3. age between 1 month and 15 years (inclusive)
4. presenting to hospital any time from 1st Jan 2022

Reporting instructions: Please report any case of acute hepatitis which meets the case definition above that occurred from 1 January 2022 irrespective of whether an infectious agent is identified.

3. Near Fatal Asthma

Case definition: Cases will be defined as **(1) or (2) or (3)**

1. Any child aged 5-15 years surviving* an acute episode of asthma, who when presenting self-ventilating with severe dyspnoea (e.g. inability to speak) and **all** the following features:
 - a. Pulse oxygen saturation below 92% despite maximal oxygen therapy (i.e. 10-15l/min oxygen flow via non-rebreather mask) during acute presentation **and**
 - b. pH \leq 7.2 and/or pCO₂ \geq 60mmHg or 8kPa **and**
 - c. Escalation to use of intravenous bronchodilator infusion
2. Any child aged 5-15 years surviving* an acute episode of asthma, who had a respiratory arrest and/or required cardiopulmonary resuscitation as part of their presentation.
3. Any child age 5-15 years surviving* an acute episode of asthma for which he/she was invasively ventilated.

*surviving to hospital discharge

Reporting instructions: Please report any case that meets the above definition. Clinicians are encouraged to report the event even if final outcome is not yet known or the patient is still receiving ongoing care in hospital.

4. Congenital and Hospitalised Neonatal Varicella

Case definition for Fetal varicella syndrome:

- 1a) Any stillborn or liveborn infant who, in the opinion of the notifying paediatrician, has confirmed or suspected fetal varicella syndrome, with or without congenital deformities based on history, clinical and/or laboratory findings.
- 1b) Any infant that presents with herpes zoster (shingles) in the first year of life (based on clinical and laboratory findings)
- 1c) Spontaneous abortion or termination of pregnancy following varicella in pregnancy.

Case definition for Neonatal varicella syndrome:

- 1) Chicken pox in an infant less than 1 month of age, regardless of gestational age at birth, based on history, clinical findings and/or laboratory findings.
