

Epilepsy12 Data Platform Launch

e12.rcpch.ac.uk

Epilepsy12 has launched a new platform for cohort 6 data entry!

Please continue to enter cohort 5 patients on the old platform.

1 Get Access

Designated leads will automatically be given access. Leads will then have to make accounts for other users.

2 Enter Data

You can begin to enter cohort 6 data now. Patients that were entered onto the old platform been migrated over.

3 Read Guidance

If you have any difficulties, read the platform guidance. You can contact us with any queries at epilepsy12@rcpch.ac.uk

How has data entry changed?

You only need to enter patients with epilepsy. We have refined the eligibility criteria and you can delete patients who are not eligible.

Registering patients is now easier. Registration only requires one concise form.

There's no need to lock and submit records. All completed records will be automatically included after the specified deadline.

There's no separate access for EEG users. EEG users can enter data, but there is no distinct EEG user type.

What are the benefits?

Focused data collection. We have reduced the number of forms and questions to complete.

Sub-trust (organisation) level reporting. Patients will be assigned to an organisation (e.g. hospital, CDC)

Live KPI dashboard. A real-time dashboard of your KPIs with regional and national comparisons.

Patient KPI summary. You will see if a patient has achieved the KPIs as you're entering their data.

Improved security. A number of measures, such as 2 factor authentication, will safeguard patient data.

Troubleshooting

I haven't got access to the platform!

Your Health Board/Trust's designated lead can add you. If your lead is unable to do so, please contact us. If you are the lead, your account will be made for you. If you haven't received an email to set your password, please contact us.

My organisation isn't on the platform!

That's ok! Please contact us with the name of the organisation.

My account set-up link has expired!

These links expire after 72 hours. Contact us and we will send you a new link.

My patients haven't been transferred over!

We have only transferred patients from Cohort 6 with registration forms that were locked and submitted before 9/11/2023. We have not transferred their First Year of Care data.

I need to remove a patient who isn't eligible!

You can delete these patients by clicking on the edit icon.

I've been assigned to the wrong organisation!

Your Trust's designated lead can fix that for you.

If you are the Lead, please contact the Epilepsy12 team.
