

PODCASTERS PROJECT

RCPCH & Us
Podcasts

ENGAGEMENT

1

Young people came together to think about what are the things that we want doctors and healthcare professionals to know about. We had young people from all over the country and Ghana join the project.

2

CHOOSING TOPICS

As a group we talked together to find out what topics to focus on. We decided on engagement for episode 1, climate change for episode 2 and about my condition & Us for episode 3. We also talked about epilepsy diagnosis for the Medicines for Children podcast.

3

POD SKILLS

We learnt about podcast skills like creating stories, being creative, creating different scenes in the episode, reviewing content and looking how you make the best episode for the audience. We always check in on our mental health too.

4

BUILDING OUR AUDIENCE

We were so excited to find out that the podcasts were going well that we have now got our own channel! It is better for us if we have all the podcasts that we create in one place, it makes it easier to find and listen too for young people and for doctors. We've had 1000s of listens already!

5

WHAT WE THINK

"it's amazing that we've had that many people listening"
"i like coming, it's fun and you get to help other people learn"
"I'm excited for the next episodes to come out!"
